

Q37 What outcomes/metrics should/could be used to assess for competency at the end of training?

Answered: 12 Skipped: 0

#	RESPONSES	DATE
1	-Rate of recurrence -Number of specimens for piecemeal EMR -Procedural duration -Whether and at what point during a case the supervisor was needed	11/13/2018 7:19 AM
2	Recurrence local Duration of the procedure	12/7/2017 5:54 PM
3	Achieving successful ER with low recurrence and complication rates in polyps of level 3 and 4 complexity (SMSA) and ESD of at least 20 mm lesions in the rectum and stomach	12/3/2017 10:10 PM
4	Complete resection Time taken per cm diameter Early and late complications Late/surveillance recurrence/residual	11/29/2017 12:37 AM
5	* adjusted DOPyS	11/18/2017 9:45 PM
6	Unassisted completion rate Residual rates Complication rates	11/13/2017 2:11 PM
7	Objective criteria based on the above described quality metrics should be used to assess competence	11/5/2017 4:37 PM
8	1. Accuracy of pre ER assessment vs histology 2. Sydney Resection Quotient 3. Duration of ER/lesion size 4. Recurrence 5. Post procedural complications	11/5/2017 4:01 AM
9	the same as for evaluating a non trainee	11/3/2017 3:16 PM
10	DOPYS or equivalent for certification prospective audit	11/3/2017 2:08 PM
11	Radicality, complications, ...	11/1/2017 12:08 PM
12	KPIs for both diagnostic and therapeutics. Endoscopist non-technical skills particularly judgement and team working. Likely to require 360 or similar.	10/31/2017 11:19 PM
